<https://github.com/noorsroor> | Zarqa, Jordan

Knowledgeable and proactive Software Developer with a fresh degree in Computer Science. Developed a plant identification Android app using Java and a captivating game in Python as part of academic projects. Skilled in Java for Android app development, Python, and C++. Proficient in Android Studio, Adobe XD, Visual Studio, and Firebase, ensuring seamless development and robust application performance. Able to effectively self-manage projects and contribute collaboratively to team efforts. Dedicated to leveraging cutting-edge technologies and methodologies to deliver innovative software solutions.

EDUCATION

Bachelor - Computer Science

Feb 2021 - Sep 2024 (Expected)

Jordan University of Science and Technology, Irbid, Irbid

Cumulative GPA: 3.83

Honors: Dean's List for academic excellence in multiple semesters, including first semesters of 2023-2024.

INTERNSHIPS

Artificial Intelligence and Machine Learning, ShAI For AI, Online

- Actively participating in projects focusing on AI and machine learning under the guidance of industry experts. Applying theoretical knowledge including data analysis and algorithm implementation

SKILLS

- Hard Skill: C++, HTML&CSS, Python, java, XML, UI/UX Design, Android Apps Development
- Software: Visual Studio Code, Adobe xd, Android Studio, Firebase, StarUML.

PROJECTS

Diamond Price Prediction Model

Technologies: Python, Machine Learning

- Created a machine learning model to predict diamond prices using advanced machine learning techniques.

Plant Identification Android Application

Technologies: Java, API, Firebase

- Developed a plant identification app for Android as a graduation project.
- Integrated an external API for plant data and used Firebase for real-time database and user authentication.

Human-Computer Interaction Project

Technologies: Adobe XD

- Designed a user-friendly UI/UX for a human-computer interaction project.
- Utilized Adobe XD to create interactive prototypes and gather user feedback for improvements.

Flappy Bird Game

Technologies: Python, VS Code

- Created a Flappy Bird game clone using Python.
- Implemented game mechanics, scoring system, and graphical elements in VS Code.
